ABSTRACT

Ayurveda is a holy science that has a broad scope in Indian Medical science. It has an important place in this world as the most ancient medical science of India, or we can say traditional Indian medical System. The drug *Duralabha* (*Fagonia Cretica*) is native to Zygophylaceae Family. Acharya Charaka has mentioned *Duralabha* in *Kasahar Mahakashay*, *Arshoghna Mahakashay*, *Trushnanigrahana Mahakashay*, and *Hikka Nigrahana Mahakashay* in the 4th Chapter of *Charaka Samhita*. Acharya Vaghbhatta mentioned it in *Ambasthadi Gana*. *Duralabha* is a medicinal plant described in *Ayurveda* with uncountable benefits. It possesses *Kashaya* (astringent), *Tikta* (bitter) *Rasa* (taste), *Madhura* (sweet) *Vipaka*, *Sheeta* (cold) *Veerya* (potency) and *Ruksha* (dry), *Laghu* (light) *Guna* (properties). In this review article, an attempt has been done to describe the traditional value of this drug and its importance of it in *Ayurveda* as well. Classical categorization, *Rasapanchaka*, *Paryaya*, *Morphology*, *Karma*, Pharmacological Actions, and Chemical Compositions have been described. In this review we can see that documentation and categorization of ayurvedic drugs are required in this modern era by this Non-Ayurvedic community also take the benefits of *Ayurveda* and its magical remedies, *Ayurveda* and its importance can be promoted by this type of efforts.
