ABSTRACT

Ayurveda is one of the most ancient life sciences and has always been practised in the form of *Ashtanga Ayurveda*. *Rasayana tantra* (Geriatrics) is one of the eight major clinical disciplines aiming at rejuvenation and geriatric care. It fulfils both the aims of Ayurveda, i.e. maintaining & promoting the positive health of healthy individuals and curing the diseases of the diseased. Descriptions of various single *Rasayana* drugs & *Rasayana* formulations, along with their particular uses, are available in various texts of different periods, but no separate *samhita* or book is found for it. Hence, here, an effort has been made to compile the scattered *Rasayana* drugs (as single or formulations) mainly mentioned in *Brihatrayi*.

Keywords: *Ayurveda, Rasayana, Brihatrayi*

INTRODUCTION

The word ‘Rasayana’ is composed of two words, *Rasa*’ & *Ayana*’, which means by which one gets the excellence of ‘Rasa’ (the nourishing fluid which is produced immediately after digestion) or obtains the best qualities of ‘Rasadi Dhatus’. It is the measure that deals with young age problems, prolongs longevity, develops positive health and mental faculties, and imparts resistance and immunity against diseases. *Sushruta* has defined a healthy man as who has ‘Equilibrium of the doshas (*sama dosha*), Normal functioning of *Agni* (*sama agni*), Normal condition of all *dhatus* (*sama dhatu*) and Normal excretion of waste products (*sama malakriya*) and besides this Soul (*Atma*), the sense organs (*Indriyas*) and Mind (*Mana*) should be happy and cheerful (*Prasannatamendriya mana*). The modern definition of health is also the same: “Health is a state of complete physical, mental and social well-being and not merely the absence of disease (WHO)”. This Healthy state of mind and body can be achieved by *Rasayana therapy* because it plays a vital role in maintaining and promoting positive health of individuals by promoting their body resistance, i.e. immunity and psycho-emotional resiliency by attaining *Rasadi dhatus*, followed by boosting the *Ojas* (vital essence of all seven *dhatus*) and helps to achieve longevity, memory, intelligence, disorder free condition, lustre & complexion excellence, optimum strength of physique and sense organs. A survey of ancient literature traces the concept of Rasayana as back as the Vedic ages, and Ayurveda is also accepted as *Upaveda* of *Atharvaveda*. The utility of *Rasayana* is also described in various *Sam-*

hitas like *Charaka*, *Sushruta*, *Vaghbata* and other books related to *samhita kala*. Still, here we choose only *Brihatrayi* for the collection of *Rasayana* drugs available in it.

Material & Method

Material is collected from the classical *Ayurvedic* literature of *Charaka samhita*, *Sushruta samhita*, *Ashtanga Hridya* & *Ashtanga Sangraha*.

Consideration of Rasayana Chikitsa in Brihatrayi

Charaka Samhita—*Charaka* has given great importance to Rasayana Chikitsa. He devoted the first chapter of Chikitsa Sthana to Rasayana. He explained the definition of rasayana, its utility, and many Rasayana yogas in detail. *Charaka* also put forward the concept of administering rasayana therapy in the form of *Vatatapika* and *Kuti praveshika* for the first time.

Sushruta samhita- *Sushruta* has described *rasayana* as an agent capable of maintaining longevity, intellect, vigour, vitality and preventing disease. He has given the comprehensive systemic and scientific classification of *rasayana* therapy. The concept of *Namittika rasayana* is the original contribution of *sushruta*. New *rasayana dravyas* and *yogas* (formulations) have been added by him.

Ashtanga hridya & *sangraha*- The description of the rasayana tantra available closely resembles *Charaka*. Definition uses, types, mode of administration, age of administration, and list of various rasayana yogas have been described in detail. He has emphasised the administration of *Rasayana* therapy in young and middle age.

DISCUSSION & CONCLUSION

Rasayana chikitsa is one of the significant methods for health prevention and curing the disease, as described in Ayurveda. Today, people lead their lives in a more sophisticated way. Improper food habits, altered lifestyles, persistent stress, water and air pollution, etc., and so many other factors are executing hazardous effects on human life. Nowadays, more emphasis is placed on preventing diseases rather than curing them after they appear in the body. This objective could be easily achieved with the help of *Rasayana chikitsa*. However, with time, this important branch of knowledge has ceased to be in its appropriate form. So, comprehensive efforts are needed to revive this practical discipline of Ayurveda for the welfare of human beings by engaging Ayurvedic scholars in various research activities for rasayana drugs from various scientific parameters.
